

# 7-1/16" 15K Modular, Single Line Missile System

Increase Operational Efficiency and Reduce HSE Exposure

Completion Equipment Rental's Single Line Missile System provides a step change by reducing the number of required connections and providing a single 7-1/16" Single Line system from Frac Blender to Frac Tree. Each high-pressure inlet is configured with a 3-1/16" 15K Flange x 3" 1502 Check Valve.

- 1 Low-Pressure Suction Header for Blender connection
- 2 Eight-Station Missile Skid
- 3 Instrumentation Skid

## Features

- Individual Modular Skids for:
  - Low-Pressure Suction Header
  - Eight-Station Missile Skid
  - Instrumentation Skid
- Single Line System from Frac Blender to Frac Tree
- High-pressure inlets configured with 3-1/16" 15K Flange x 3" 1502 Check Valves
- Suction Header equipped with butterfly valve to enable split flow operations
- Hammer Union external ports to allow for quick inspections
- 15K API flange connections
- Up to 120 BPM

## Benefits

- Shortens transition times from pad to pad
- Ready on site before frac crew arrives allowing for faster rig up
- Improved operational efficiency
- Reduces HSE exposure
